ABOUT THE ICGET SERIES

The ICGET series recognizes and celebrates interdisciplinarity; they present opportunities for discourse about innovative ideas based on emerging technologies, and the challenges and prospects of current advancement in technology. Considering current trends with Generative AI and other emerging AI-powered tools, ICGET2024 presents an excellent opportunity to explore, discuss and collaborate to address the current challenges and develop future innovations. The tracks and potential topics cover various issues related to development, applications, and interdisciplinary systems related to AI.

ICGET 2024 engages a diverse audience including Academics and researchers, Educators and administrators, Industry Professionals Policymakers and Government Officials, Postgraduate and Doctoral Scholars and Non-Profit Organizations interested in the cutting-edge intersection of technology, society, and interdisciplinary research.
